PM Shtayyeh says financial crisis is a result of US and Israel's money war against the Palestinians

RAMALLAH, Monday, September 28, 2020 (WAFA) – The financial crisis facing the Palestinian government is due to the money war waged by the United States and Israel against the Palestinians, today said Prime Minister Muhammad Shtayyeh.

Speaking through a video conference at the weekly cabinet meeting in Ramallah, Shtayyeh also said that the discontinuation in Arab financial support has also contributed to this crisis.

"The cause of the financial crisis that we have been facing for months is the money war waged by the American administration, and later Israel, and the discontinuation of Arab aid other than what Arab funds provide for projects, as well as the European Union, Asian countries and the World Bank, and these are mostly for projects and not for salaries," he said.

"The United States was providing us about \$500 million, and these funds stopped and the aid that came from the Arab countries, amounting to about \$350 million, has stopped, except what the funds provide us, and the Arab countries have not abided by their decisions related to the financial safety net to protect Palestine from extortion," he explained.

Shtayyeh said, "The Corona pandemic caused great damage to the world economy and to our economy, and our income decreased by 60%. Then came the issue of Israeli annexation based on the (US) Deal of the Century when the Palestinian leadership decided to absolve itself from the agreements signed with Israel, including the financial agreement. After that all relations with Israel were stopped. We implemented an austerity program and expenditures were reduced by about 70%, but in order to enhance your (the public) role and steadfastness and alleviate your suffering, we borrow about 400 million (Israeli) shekels (\$115 million) from banks every month to pay only half the salaries, and we pay interest to the banks on this amount."

The Prime Minister explained that 350,000 salaries are paid every month, which go to military and civilian personnel, the needy families who amount to 120,000, including 81,000 families in the Gaza Strip, 140,000 employees in the West Bank and Gaza, in addition to 75,000 retired military and civilian personnel in the West Bank and Gaza, as well as the families of prisoners and martyrs at home and in the Diaspora.

Shtayyeh addressed the public employees, saying, "Your salaries will be paid to you in full when we get them (the clearance tax revenues collected by Israel) without any political blackmail from Israel or the United States."

He explained in figures the size of the massive deficit facing the treasury as a result of the cessation of financial support.

"We need about 1.2 billion shekels (\$350 million) per month of which about 500 million shekels (\$145 million) are from the clearance, which is completely stopped now, and local taxes have dropped from 350 million shekels (\$100 million) a month to 200 million shekels (\$58 million). The clearance has stopped for reasons related to the Palestinian leadership's decision to stop dealing with Israel, and the government is committed to that in order to face the blackmail that Israel is trying to dictate to us," he said, assuring people that he is confident that "this affliction will go away."
